**A Trauma-Informed Approach to Improving Dementia
Care in Georgia's Nursing Homes Scholarship Program**
SEAT RESERVATION APPLICATION FORM

As part of a grant from the Centers for Medicare and Medicaid Services (CMS) and the Georgia State Survey Agency, this certification is intended to increase opportunities for Georgia nursing home staff and related stakeholders to gain training in various aspects of trauma-informed dementia care.

This certification will provide Georgia nursing home staff and related stakeholders, including: residents, informal care partners for a resident (family, friend, volunteer), Georgia Long Term Care Ombudsman, and State of Georgia Surveyors, an opportunity to increase their skills in providing person-centered care.

You may register as an individual from a Georgia nursing home, however, we recommend teams of 4-6 staff from the same nursing center apply. We suggest teams include at least one person from senior management, one-two department supervisors and the remainder direct care and other support staff. If possible, include other stakeholders such as a resident, family member, volunteer, or even your local ombudsman to participate with your team.
